OBJECTIVE:

- A mid-level development position in an organization seeking a quick-learning and talented developer/administrator of open systems.

SKILL SUMMARY:

- Internet project management experience.
- Five years web development with LAMP (Linux, Apache, MySQL, PHP) style environment.
- Six years experience managing web/ftp, mail and dns servers.
- Six years website design experience.
- Excellent database planning/design skills.

EXPERIENCE:

Personal Sites/Servers - 1998 to present

- Summary: Developed numerous websites over the course of 8 years while I taught myself how to program. I explored different mail servers, ftp servers and databases. I also experimented with many different operating systems during this time and have installed, configured and used many flavors of the UNIX family.
- Technology used: Yellow Dog Linux, Debian Linux, Red Hat Linux, Slackware Linux, Mac OS Classic/X, FreeBSD, NetBSD, Windows 3.1/95/98/Me/NT/2000/XP, OpenVMS, Tru64 UNIX, shell scripting, Apache httpd, PHP 4/5, Perl 5.x, HTML 4, XHTML 1.1, CSS 1/2, MySQL 3.x/4.x, PostgreSQL 6.x/7.x, sendmail, Postfix, ProFTPd, lukemftpd, C, C++, RealVNC.

School Media/Technology Assistant - Mar 2007 to present, District School Board of Pasco County, FL

- Summary: Assistant to Instructional Technology Specialist at J. W. Mitchell High School. Maintained over 1000 workstations/laptops for teachers and students. Developed numerous small programs for automated, secure backup of LDAP server and general maintenance of documents servers. Custom OS X package install creation. Setup & maintenance of network boot systems and automated OS restoration services. FileMaker Pro database debugging. School-wide DNS, network user & file sharing services. Remote management of multiple computer labs. Hardware troubleshooting from laptops to servers and RAID arrays. Outlining upgrade plans & procedures. Data entry to Sirsi Unicorn database.
- Technology used: Mac OS 9, 10.3/10.4 Client/Server, Windows XP, RAID storage, shell scripting, FileMaker Pro 6, 8 & 9 Client/Server, Apple Remote Desktop 3, Xcode 2.4, OpenLDAP, Apache httpd, PHP 4/5, Perl 5, XHTML 1.1, CSS 3, MySQL 4.x, Sirsi Unicorn/WorkFlows

Grubbs Emergency Services - Jun 2005, Complete Technology Solutions

- Summary: Assisted with debugging of ASP with MSSQL interaction for internal inventory and invoice generating website.
- Technology used: ASP, IIS, MSSQL, FreeBSD, Mac OS X, shell scripting.

Kinematics & Controls Corp. Website - Apr 2005 to Jun 2005, Complete Technology Solutions

- Summary: Worked as part of a team to develop www.kcontrols.com, a site detailing Kinematics' products using Perl CGI.
- Technology used: Slackware Linux, RedHat Linux, FreeBSD, Apache httpd, MySQL 4.x, Perl 5, JavaScript, shell scripting, Quanta+ IDE.

Embedded System Development - Mar 2005 to Jun 2005, Complete Technology Solutions

- Summary: Performed research & development for embedded computer systems with no moving parts (solid-state storage, air cooled)

- Technology used: Slackware Linux, NetBSD, Windows XP Embedded.

CTS Servers - Mar 2005, Complete Technology Solutions

- Summary: Moved some internal servers and public DNS/mail/web servers from Linux to FreeBSD, updating each to latest stable release.
- Technology used: RedHat Linux, FreeBSD, Apache httpd, PHP 5, Perl 5, MySQL 4.x, sendmail, ProFTPd, BIND, SonicWall Firewall.

WorkNet Pinellas - Feb 2005 to Jun 2005, Complete Technology Solutions

- Summary: Migrated www.worknetpinellas.org from an IIS/ASP site to LAMP (Linux, Apache, MySQL, PHP) environment without access to source code.
- Technology used: Slackware Linux, RedHat Linux, FreeBSD, Apache httpd, PHP 5, MySQL 4.x, CSS, Quanta+ IDE.

Internal Tracking Website - Jan 2005 to Feb 2005, Complete Technology Solutions

- Summary: Created a web-managed database to keep track of employees, jobs and clients. Included tracking all hardware, software and network information for each client location and billable time for each job.
- Technology used: Slackware Linux, RedHat Linux, FreeBSD, Apache httpd, PHP 4, MySQL 3.x, CSS, JavaScript, Quanta+ IDE.

Volkswagen - Summer 2004, Private

- Summary: Unofficially assisted in development of www.vw.com by debugging PHP for a close friend who was working at an advertising & design agency in Gloucester, England.
- Technology used: PHP 4, Mac OS X.

Computer Technician - Summer 2004, OY Thomas Studios

- Summary: Troubleshooting and system updates for Mac, Windows and commercial dye-sub printing systems.
- Technology used: Mac OS X, Mac OS 9, Windows XP, Adobe Photoshop.

UCF - Aug 2003 to Spring 2004

- Summary: Developed e-commerce software using LAMP for web design class. Re-wrote TCP/IP socket libraries for use on Solaris based email client.
- Technology used: Mac OS X, Debian Linux, Solaris 8, Apache httpd, MySQL, PostgreSQL, PHP 4, CSS, JavaScript, C, C++.

Hudson High School - Aug 2002 to May 2003

- Summary: Assisted my High School's Technical Specialist, Victor Mallett, in maintaining school network and keeping all computers up-to-date and in good working order.
- Technology used: Mac OS X, Mac OS X Server, Mac OS 9, Windows XP, Adobe Photoshop, Making The Grade, Apache httpd, PHP 4, FileMaker Pro, Apple Remote Desktop.

EDUCATION:

University of Central Florida, Orlando, FL. 2003-2004, no degree. Majored in Information Technology.
Hudson High School, Hudson, FL. 1999-2003, graduated with honors May 2003.

LANGUAGE:

Fluent in English and French.
